PRE-K

Getting Smarter Every Day

Tutor Time knows the importance of preparing children for Kindergarten. Our nurturing, secure environment combined with our unique Tutor Time® LifeSmart™ curriculum makes our Pre-K program the ideal place to discover, learn and grow.

Every kid is a smart kid — that's the philosophy behind everything we do at Tutor Time. Nurturing a lifelong love of learning starts in the early years, by engaging children in concepts and activities, and letting them investigate and create their own extraordinary knowledge.

Tutor Time® Lifesmart™ Curriculum

The principles of the Tutor Time® LifeSmart™ curriculum follow the guidelines for developmentally appropriate practice set for by the National Association for the Education of Young Children. We encourage investigation, problem-solving and discovery. And we give kids the tools they need to grow and develop into productive members of society and the leaders of tomorrow.

While building a rocket from boxes and buttons, your child engages in creative problem-solving. Later, as the class talks about where and how rockets you're your child learns about science and nature. At Tutor Time we recognize that children are smart in many ways which we have categorized the eights "Smarts."

That's Smart!

Our Pre-K program is built around activities that encourage exploration, investigation, problem-solving and discovery, fostering curiosity and enthusiasm in every child. And we give kids the tools they need to grow and develop into productive members of society and the leaders of tomorrow. Tutor Time — it's education and care you just won't find anywhere else.
